1. Introduction

The **FITBOT AI Chatbot** is a comprehensive WordPress plugin designed for fitness and health websites. It integrates with OpenAI's GPT-4 Turbo API to provide personalized fitness advice, nutrition guidance, and health recommendations based on user subscription plans.

Key Features

- **AI-Powered Chat:** Uses OpenAI GPT-4 Turbo for intelligent responses
- **Subscription-Based Access:** Integrates with WooCommerce Subscriptions
- **Multi-Language Support:** Auto-detects user language and responds accordingly
- **Responsive Design:** Works perfectly on mobile, tablet, and desktop
- **Content Management:** Upload recipes, workouts, PDFs, and motivation messages
- **Plan-Based Features:** Different features for Start (€5/mo), Pro (€12/mo), and VIP (€24/mo) plans

2. Installation

Step 1: Download the Plugin

Download the `fitbot-ai-chatbot.zip` file provided to you.

Step 2: Upload to WordPress

1. Log in to your WordPress admin dashboard
2. Navigate to **Plugins** → **Add New**
3. Click **Upload Plugin**
4. Choose the `fitbot-ai-chatbot.zip` file
5. Click **Install Now**
6. Click **Activate Plugin**

Step 3: Verify Installation

After activation, you should see **FITBOT** in your WordPress admin menu.

3. Initial Configuration

Step 1: Configure OpenAI API

1. Go to **FITBOT** → **Settings**
2. In the **API Settings** tab:
 - Enter your **OpenAI API Key**
 - Set **Chatbot Delay** (default: 3000ms)
 - Click **Test API Connection** to verify

Step 2: WooCommerce Integration

1. In the **WooCommerce** tab:
 - Enter **Start Plan Product ID** (for €5/mo plan)
 - Enter **Pro Plan Product ID** (for €12/mo plan)
 - Enter **VIP Plan Product ID** (for €24/mo plan)

Step 3: UI Customization

1. In the **UI Settings** tab:
 - Choose **Primary Color** for the chatbot
 - Set **Chatbot Position** (bottom-right, bottom-left, etc.)
 - Configure **Greeting Message**
 - Enable/disable **Sound Effects** and **Typing Indicators**

Step 4: Save Settings

Click **Save Settings** to apply all configurations.

4. Admin Interface Guide

Settings Page

Access via **FITBOT** → **Settings**

API Settings Tab

- **OpenAI API Key:** Your OpenAI API key for GPT-4 Turbo
- **Chatbot Delay:** Delay before chatbot appears (milliseconds)
- **Test API Connection:** Verify your API key works

WooCommerce Tab

- **Start Plan Product ID:** WooCommerce product ID for Start plan
- **Pro Plan Product ID:** WooCommerce product ID for Pro plan
- **VIP Plan Product ID:** WooCommerce product ID for VIP plan

UI Settings Tab

- **Primary Color:** Main color for chatbot interface
- **Chatbot Position:** Where chatbot appears on screen
- **Greeting Message:** First message users see
- **Enable Sound:** Sound notifications for new messages
- **Enable Typing Indicator:** Shows when bot is “typing”

Upgrade Messages Tab

- Customize messages shown when users need to upgrade plans

Content Management Page

Access via **FITBOT** → **Content**

Recipes Tab

- Upload and manage recipe content
- Set meal types (breakfast, lunch, dinner)
- Assign to subscription plans
- Add nutrition information

Workouts Tab

- Upload workout routines
- Set difficulty levels and duration
- Assign equipment requirements
- Tag with conditions (thyroid-safe, etc.)

Motivation Tab

- Add daily motivation messages
- Schedule or randomize delivery

PDFs Tab

- Upload downloadable resources
- Meal plans, workout guides, etc.
- Available for VIP plan users

Bulk Upload Tab

- Upload multiple content items at once
 - Drag-and-drop interface
 - Progress tracking
-

5. Frontend Display

How the Chatbot Appears

The chatbot automatically appears on **every page** of your website after the configured delay (default: 3 seconds).

Visual Elements

1. **Floating Button:** Appears in bottom-right corner (or configured position)
2. **Chat Window:** Opens when button is clicked
3. **Responsive Design:** Adapts to mobile, tablet, and desktop screens

User Experience Flow

1. **Page Load:** User visits any page on your website
2. **Delay:** Chatbot waits 3 seconds (configurable)
3. **Appearance:** Floating button slides in
4. **Interaction:** User clicks button to open chat
5. **Greeting:** Bot displays personalized greeting message
6. **Conversation:** User can ask questions and get AI responses

Customization Options

Position Settings

- **bottom-right:** Default position
- **bottom-left:** Left side of screen
- **top-right:** Upper right corner
- **top-left:** Upper left corner

Color Themes

- Set primary color in admin settings
- Automatically generates complementary colors
- Maintains accessibility standards

Mobile Optimization

- Touch-friendly buttons
 - Optimized text size
 - Swipe gestures supported
 - Full-screen chat on small devices
-

6. Content Management

Adding Recipes

1. Go to **FITBOT → Content → Recipes**
2. Click **Add New Recipe**
3. Fill in:
 - **Title:** Recipe name
 - **Content:** Description and instructions
 - **Ingredients:** List of ingredients
 - **Prep Time:** Preparation time in minutes
 - **Cook Time:** Cooking time in minutes
 - **Servings:** Number of servings
 - **Nutrition:** Calories, carbs, fats, protein
4. **Assign Plan Level:** Start, Pro, or VIP
5. **Set Meal Type:** Breakfast, lunch, dinner
6. **Add Conditions:** Thyroid-safe, keto-friendly, etc.
7. Click **Publish**

Adding Workouts

1. Go to **FITBOT → Content → Workouts**
2. Click **Add New Workout**
3. Fill in:
 - **Title:** Workout name
 - **Content:** Workout description
 - **Duration:** Time in minutes
 - **Difficulty:** Beginner, intermediate, advanced
 - **Equipment:** Required equipment
 - **Exercises:** List of exercises
4. **Assign Plan Level:** Pro or VIP (workouts not available for Start)
5. **Set Workout Type:** Cardio, strength, flexibility, etc.
6. **Add Conditions:** Condition-specific modifications
7. Click **Publish**

Adding PDFs

1. Go to **FITBOT → Content → PDFs**
2. Click **Add New PDF**
3. Fill in:
 - **Title:** PDF name
 - **Content:** Description
 - **Upload File:** Select PDF file
4. **Assign to VIP Plan** (PDFs only available for VIP users)
5. Click **Publish**

Bulk Upload

1. Go to **FITBOT → Content → Bulk Upload**
 2. **Drag and drop** multiple files
 3. **Select content type** for each file
 4. **Assign plan levels** in bulk
 5. Click **Process Upload**
 6. Monitor progress bar
-

7. WooCommerce Integration

Setting Up Subscription Plans

Create WooCommerce Products

1. Go to **Products → Add New** in WooCommerce
2. Create three subscription products:

Start Plan (€5/mo) - Product Type: Simple Subscription - Price: €5 - Billing Period: Monthly - Features: 1 recipe/day, basic Q&A

Pro Plan (€12/mo) - Product Type: Simple Subscription - Price: €12 - Billing Period: Monthly - Features: 3 recipes/day, workouts, nutrition facts

VIP Plan (€24/mo) - Product Type: Simple Subscription - Price: €24 - Billing Period: Monthly - Features: Unlimited recipes, health answers, PDFs

Configure Plugin Settings

1. Note the **Product IDs** from WooCommerce
2. Go to **FITBOT → Settings → WooCommerce**
3. Enter the Product IDs for each plan
4. Save settings

How Plan Detection Works

The plugin automatically:

1. **Checks user login status**
2. **Queries active subscriptions**
3. **Determines highest plan level**
4. **Restricts features accordingly**
5. **Shows upgrade prompts** when needed

Upgrade Flow

When users request features outside their plan: 1. **Bot explains limitation** 2. **Suggests appropriate upgrade** 3. **Provides upgrade link** 4. **Redirects to WooCommerce checkout**

8. Troubleshooting

Common Issues

Chatbot Not Appearing **Possible Causes:** - JavaScript errors on page - Plugin not activated
- Conflicting plugins

Solutions: 1. Check browser console for errors 2. Deactivate other plugins temporarily 3. Switch to default theme to test 4. Clear cache if using caching plugins

API Connection Failed **Possible Causes:** - Invalid OpenAI API key - Network connectivity issues - API quota exceeded

Solutions: 1. Verify API key in OpenAI dashboard 2. Test API connection in plugin settings 3. Check OpenAI account billing status 4. Contact OpenAI support if needed

Subscription Detection Not Working **Possible Causes:** - Incorrect Product IDs - WooCommerce Subscriptions not active - User not logged in

Solutions: 1. Verify Product IDs in WooCommerce 2. Ensure WooCommerce Subscriptions is active 3. Test with logged-in user account 4. Check subscription status in WooCommerce

Mobile Display Issues **Possible Causes:** - Theme CSS conflicts - Viewport meta tag missing - JavaScript errors on mobile

Solutions: 1. Add viewport meta tag to theme 2. Check mobile-specific CSS 3. Test on actual mobile devices 4. Use browser developer tools mobile emulation

Debug Mode

Enable WordPress debug mode to see detailed error messages:

```
// Add to wp-config.php
define('WP_DEBUG', true);
define('WP_DEBUG_LOG', true);
define('WP_DEBUG_DISPLAY', false);
```

Check debug logs in /wp-content/debug.log

9. Advanced Features

Custom CSS Styling

Add custom styles to your theme's CSS:

```

/* Customize chatbot button */
.fitbot-chatbot-button {
    background-color: #your-color !important;
    border-radius: 50% !important;
}

/* Customize chat window */
.fitbot-chat-window {
    max-width: 400px !important;
    box-shadow: 0 10px 30px rgba(0,0,0,0.3) !important;
}

/* Mobile-specific styles */
@media (max-width: 768px) {
    .fitbot-chat-window {
        width: 100% !important;
        height: 100% !important;
    }
}

```

JavaScript Hooks

Use JavaScript hooks to customize behavior:

```

// Before chatbot initializes
document.addEventListener('fitbot_before_init', function(e) {
    console.log('Chatbot initializing...');
});

// After message sent
document.addEventListener('fitbot_message_sent', function(e) {
    console.log('Message sent:', e.detail.message);
});

// After response received
document.addEventListener('fitbot_response_received', function(e) {
    console.log('Response received:', e.detail.response);
});

```

PHP Filters

Customize plugin behavior with WordPress filters:

```

// Modify greeting message
add_filter('fitbot_greeting_message', function($message, $user_plan) {
    if ($user_plan === 'vip') {
        return 'Welcome back, VIP member! How can I help you today?';
    }
    return $message;
});

```

```
}, 10, 2);

// Modify API request parameters
add_filter('fitbot_gpt_request_params', function($params) {
    $params['temperature'] = 0.8; // More creative responses
    return $params;
});
```

10. FAQ

General Questions

Q: Do I need an OpenAI account? A: Yes, you need an OpenAI account and API key to use the chatbot functionality.

Q: What's the cost of using OpenAI API? A: OpenAI charges based on token usage. Typical costs are \$0.01-0.03 per conversation.

Q: Can I use this without WooCommerce? A: The plugin requires WooCommerce Subscriptions for plan management. Without it, all users will be treated as having no plan.

Q: Is the chatbot GDPR compliant? A: The plugin stores conversation logs locally. You're responsible for your privacy policy and data handling practices.

Technical Questions

Q: Can I customize the chatbot appearance? A: Yes, through admin settings and custom CSS. The plugin provides extensive customization options.

Q: Does it work with caching plugins? A: Yes, but you may need to exclude the AJAX endpoints from caching.

Q: Can I translate the plugin? A: The plugin is translation-ready. The AI responses will automatically match the user's language.

Q: What happens if OpenAI is down? A: The plugin will show a friendly error message and log the issue for debugging.

Subscription Questions

Q: How are plan limits enforced? A: The plugin tracks daily usage and blocks requests when limits are reached, showing upgrade prompts instead.

Q: Can users downgrade plans? A: Plan changes are handled through WooCommerce Subscriptions. The plugin will automatically adjust features.

Q: What if a user's subscription expires? A: The plugin will detect expired subscriptions and treat the user as having no plan.

Support

For technical support or questions about the FITBOT AI Chatbot plugin:

1. **Check this documentation** for common solutions
 2. **Enable debug mode** to identify specific issues
 3. **Test with default theme** to rule out conflicts
 4. **Contact the developer** with specific error messages and steps to reproduce
-

Changelog

Version 1.0.0

- Initial release
 - OpenAI GPT-4 Turbo integration
 - WooCommerce Subscriptions support
 - Responsive design
 - Multi-language support
 - Content management system
 - Plan-based feature restrictions
-

This documentation covers the complete functionality of the FITBOT AI Chatbot plugin. Keep this guide handy for reference during setup and ongoing management of your AI-powered fitness chatbot.
